Yes. I know. I don't know why. Fran seems to ignore this issue. Seems I bring it up during the meetings like a pariah.

I do know that when Raj started doing this work I received a call from HQ OEM to Janine Dinan and from ERT John Gilbert because ERT boss Harry Compton wanted to know what we were doing.....were we really going to collect samples without a screening value? I explained maybe not but it didn't hurt to work on a method.

I don't know what to say. I get frustrated by the inaction.esp now when we may have someone who can help develop a screening value, we have been asked to assist, etc.

Dennis had mentioned that Fran wasn't interested in the air sampling. I mean WVDEP is requesting it from us as our assistance, so I think we should actually do what they are requesting especially if management thinks we still need to remain on site assisting WVDEP. But that's

above our pay grades hehe

Ah....you are ahead of me..... I just printed out his CV....will take a look...

Hopefully there is an open contract.

(I am not confident Fran/management will go for this.....but I am a negative thinker generally.
Guess we will see.)

Since he has done work with EPA, is there a possibility that EPA meaning ORD or HQs still has an open contract with him which would make it a lot easier to work through if we chose to go this path?

Subject: FW: Ex. 6 - Personal Privacy

I spoke with Dr. Ex. 6 - Personal Privacy day. Attached is his CV. He is the person recommended by NIOSH's Krank Hearl as an expert in developing exposure values. Granted, primarily (or entirely?) for occupational values but.....if we sample at the site during tank dismantling, occupational exposure would be the initial focus. I will go out on a limb and say the risk assessment process is similar for the development of public health exposure values, the occupational value can be modified using uncertainty factors and exposure duration adjustments to address public health, the current circumstances call for a less rigorous and time-consuming approach, etc. Karl, Janine or Dawn can comment.....

Quick points:

- He is interested in the project
- He has had some discussion with WVDEP's Dr Larry Sirinek but not directly on this issue
- He believes an approximate two week process is possible (he already is up to speed on MCHM tox and chemical data)
- If we were interested in using his services, he already has a contractual agreement with NIOSH (possibly there is a way to obtain his help through an IAG with NIOSH?)
- I pressed for an *estimated cost* Ex. 4 - CBI (please be discreet with this figure)

I suggest we can discuss on the call tomorrow.

As mentioned earlier, ERT chemist Raj Singhvi has asked if he can go to a location to field test the air sampling method he has developed for MCHM.

I made no commitments to Dr. Ex. 6 - Personal Privacy

Thanks,

Jack

Subject: Ex. 6 - Personal Privacy CV

Greetings Jack. I am happy to help out if I can. As we discussed my CV is attached. The person that I have interacted with from WV DEP is Dr. Larry Sirinek in case there are any cross-connections to make.

Best regards,
